Certificate of Compliance

PFAS (Per- and polyfluoroalkyl substances)

Per- and polyfluorinated alkyl substances (hereafter abbreviated as PFAS) are a group of extremely persistent chemicals that are used in many consumer products. PFAS are used in products because they can, for example, increase oil and water repellency or withstand high temperatures. Currently, there are more than 4700 different PFAS that accumulate in humans and the environment.

ATP Electronics Inc. (ATP) hereby declares that all ATP products do not contain PFAS.

ATP does not directly purchase any PFAS.

ATP products have been manufactured without the intentional use of PFAS.

We have communicated our requirements to our suppliers to ensure that PFAS are not used in our products. We have subsequently obtained declarations from our suppliers confirming their commitment and upstream due diligence.

ATP is diligently working to ensure that our supply chain is and remains free of PFAS. Please contact us if you have any further questions about our program.
